# Project Management Today

## Predictive vs. Adaptive

Ready, Aim, Fire!

Ready, Fire, Aim, Aim, Aim...

# Manifesto for Agile Software Development

We are uncovering better ways of developing software by doing it and helping others do it.

Through this work we have come to value:

**Individuals and interactions** over processes and tools

**Working software** over comprehensive documentation

**Customer collaboration** over contract negotiation

**Responding to change** over following a plan

That is, while there is value in the items on the right, we value the items on the left more.

# THE DECLARATION OF INTERDEPENDENCE

SIX PRINCIPLES

TO BENEFIT YOU AND YOUR AGILE ORGANIZATION

BY ALISTAIR COCKBURN

- » We increase return on investment by making continuous flow of value our focus.
- » We deliver reliable results by engaging customers in frequent interactions and shared ownership.
- » We expect uncertainty and manage for it through iterations, anticipation, and adaptation.
- » We unleash creativity and innovation by recognizing that individuals are the ultimate source of value, and creating an environment where they can make a difference.
- » We boost performance through group accountability for results and shared responsibility for team effectiveness.
- » We improve effectiveness and reliability through situationally specific strategies, processes and practices.
